

About Plantcon

PLANTCON A/S is a company specialised in Plant Design software from CADCENTRE Ltd, Cambridge UK. We are CADCENTRE Partner for Denmark, where we are responsible for product sales, offering consultant services, PDMS training courses and integration services, which means:

- Customising and integration of CADCENTRE product in customers IT environment.
- Develop special interfaces for PDMS.
- Develop PML2 macros for PDMS.
- Participant together with PDMS customers in project work - mainly on catalogue, specification and macro (programming) work.
- Other general software and computer job, which not conflict with our interest in CADCENTRE products.

Interface example - to PDMS panels from Ideas UNV format (FEM model of a engine block)

History

PLANTCON A/S is founded January 1st 1999 as a Limited company. We took over a business area, which belong to the company ELSAMPROJEKT until December 31st 1998. ELSAMPROJEKT was CADCENTRE agent since 1996 - and now we are business partners.

Customer

Client includes plant constructors/owner and engineering contractors such as Wärtsilä NSD Finland Oy, ELSAMPROJEKT A/S, PlantWare, FLS Miljø, STATOIL, Denmark, ELSAM and ELTRA.

Plantcon give away simple PML macros for free on our homepage.

Most of the macros are simple equipment macros with stuff normal in the zone between the possibility to make nice presentation material and plant design! (See a list on the backside).

This crane is one of the macros.

Visit our homepage for free download of PDMS macro.

Contact information

**Plantcon A/S , Kraftværksvej 53
DK7000 Fredericia, Denmark**

**Telefon: +45 7622 3000
Telefax: +45 7622 3001**

**E-mail: kek@plantcon.dk
Homepage: www.plantcon.dk**

As mentioned, we offer to build special applications integrated with PDMS e. g. interfaces for analyse programs, interfaces to other CAD systems, special reports and lot of other topics in customising PDMS.

We do projects work anywhere, but prefer mostly to work out from our offices in Denmark and deliver the finish product by E-mail - ready to install and test on customer site.

If you need assistance to a development job do not hesitate asking us for a suggest or a tender.

3D Letters

The pictures over these lines show what else Plantcon give away for free. Beside you will find link to few more free macros for download - not made by Plantcon - on our homepage.

It is possible to import data into PDMS, which not really is Plant Data. It can be data for ships and other special shapes, e.g. in this example wings from windmill. Following is few examples of type of programs made from PLANTCON.

In this example you see wings constructed for a Wind-Turbine imported into PDMS as panels

PLANTCON A/S offers a program to treat survey data. The survey is made from panels and the input data is 3D co-ordinates.
